

International Student Workshop on Materials Science and Engineering 2021 (ISWMSE 2021)

Kyushu Institute of
Technology

National Taiwan University
of Science and Technology

Changwon National
University

Sepuluh Nopember
Institute of Technology

**December 20-21, 2021
Virtual**

Aim

We hold this joint workshop on materials science and engineering. The purpose of this workshop is offering an opportunity of sharing scientific and technological knowledges, education of students, and international collaboration between participating professors and students.

Materials science and engineering has opened new scientific fields in fundamental researches, and also has significant roles in technologies. Innovation in materials promises to advance the science and technologies. Each university and institution is performing active researches on materials science and engineering, and has strong research areas. Our understanding of materials will be deepened by sharing these knowledges. This workshop may also offer an opportunity to start a new co-research.

There are many international conferences on materials science and engineering. It may be difficult for some students to participate in such conferences, and the workshop for educating students are limited. In this workshop, many students present their results, and some of the students join the workshop organization.

International collaboration of professors and international interaction between students are required. International collaboration partners on the department level are very important for the international activity, and the joint workshop deepens the partnership between the departments as well as individual professors and students.

We expect active discussions and interaction between participating students and professors. In future, we expect not only to keep this international collaboration platform but also to expand the collaboration partner to other universities and institutions.

Professor Session

Professor session (20, December)

Room 1

9:10-10:50 (Indonesia), 10:10-11:50 (Taiwan), 11:10-12:50 (Korea, Japan)

Chair: Jun-Seob Lee (Changwon National University), Diah Susanti (Sepuluh Nopember Institute of Technology)

9:10-9:35 (Indonesia), 10:10-10:35 (Taiwan), 11:10-11:35 (Korea, Japan)

Sigit Tri Wicaksono (Sepuluh Nopember Institute of Technology)

“High potential of Indonesia’s natural resources: From Research to Better Life and National Competitiveness”

9:35-10:00 (Indonesia), 10:35-11:00 (Taiwan), 11:35-12:00 (Korea, Japan)

Jyh-Chien Chen (National Taiwan University of Science and Technology)

“Introduction to the Department of Materials Science and Engineering at National Taiwan University of Science and Technology (NTUST)”

10:00-10:25 (Indonesia), 11:00-11:25 (Taiwan), 12:00-12:25 (Korea, Japan)

Youngung Jeong (Changwon National University)

“Elasto-visco-plastic self-consistent polycrystal model and its applications”

10:25-10:50 (Indonesia), 11:25-11:50 (Taiwan), 12:25-12:50 (Korea, Japan)

Manabu Ishimaru (Kyushu Institute of Technology)

“Introduction of the Department of Materials Science & Engineering, Kyushu Institute of Technology”

Student Session

Chair: Hsueh-Sheng Tseng (National Taiwan University of Science and Technology), Jefri Kurniawan (Sepuluh Nopember Institute of Technology)
